

MARKET CATEGORY

AI Interface Design & Human-AI Interaction Platforms

BACK-OFFICE AI TERM

AI UX / Human-AI Interaction Design / AI Interface Standards

CATEGORY HOOK

The AI model is the engine. The interface is the product. Most AI tools today are brilliant underneath and bewildering on the surface. The companies that crack AI UX — making powerful models feel intuitive, trustworthy, and human — will capture the mass market that technical interfaces will always miss. UI for AI is a category unto itself.

PRIMARY BUYER

AI product designers, no-code AI platform builders, enterprise software teams replatforming around AI, and UX researchers specializing in human-AI interaction.

IMAGINE SCENARIOS

DopeAlui.com A showcase and community platform for exceptional AI interface design — the Dribbble for AI UX, where the best human-AI experiences get celebrated and studied.

SourceAlui.com An open-source design system for AI-facing applications — the component library that makes building great AI interfaces accessible to every team.

OurAlui.com A collaborative enterprise AI interface design platform — where product teams co-create and standardize AI interaction patterns across an organization.

BestUIforAI.com The authoritative UX standard for AI products — research, certification, and pattern libraries that define what 'best' looks like in human-AI interaction.
