

MARKET CATEGORY

AI Transparency, Verification & Trust Infrastructure

BACK-OFFICE AI TERM

AI Trust & Safety / Explainable AI / Provenance & Verification Layer

CATEGORY HOOK

Deepfakes. Hallucinations. Synthetic media. The single most valuable asset in AI's next decade won't be intelligence — it will be verified truth. Organizations that build trust infrastructure for AI outputs are solving the defining credibility crisis of our era. They need names that say so, loudly.

PRIMARY BUYER

AI auditing firms, content authentication companies, enterprise compliance teams, media organizations building verification tools, and governance-first AI vendors.

IMAGINE SCENARIOS

TruthTelling.ai A media verification suite that authenticates AI-generated content before publication — the compliance layer for responsible journalism.

AutomatedTruth.ai An explainability platform that generates human-readable audit trails for AI decisions — built for regulated industries.
