

MARKET CATEGORY

AI Governance, Guardrails & User Experience Infrastructure

BACK-OFFICE AI TERM

AI Governance / Responsible AI UX / AI Policy Infrastructure

CATEGORY HOOK

AI without guardrails is liability without limit. As enterprises scale AI deployment, the demand for governance frameworks, acceptable use policies, and UX best practices is outpacing the supply. The 'For AI' category names the tools built specifically to make AI deployments defensible, compliant, and user-ready.

PRIMARY BUYER

AI governance vendors, enterprise legal and compliance teams, UX researchers specializing in AI interfaces, and policy makers developing responsible AI frameworks.

IMAGINE SCENARIOS

BestUIforAI.com A design system and UX standards platform built specifically for AI-facing products — the Figma for AI interface design.

ForCertain.ai A confidence-scoring and verification layer for AI outputs — helping enterprise teams know when to trust the model and when to escalate.

AlitForYourself.com A self-serve AI configuration platform for non-technical business users — bringing prompt engineering and custom model tuning to the mainstream.
