

MARKET CATEGORY

AI-Enabled Health & Wellness Platforms

BACK-OFFICE AI TERM

AI-Enabled Health Platform / Vertical Health AI / Digital Therapeutics

CATEGORY HOOK

The AI health market is projected to exceed \$187 billion by 2030. But most platforms still sound like they were named by a hospital committee in 2009. The founders who claim the emotional, outcomes-driven naming layer of this space will own consumer trust before the incumbents know what hit them.

PRIMARY BUYER

Digital health founders, corporate wellness program leads, telehealth platforms, health-tech VCs, and nurse practitioners building AI-assisted care tools.

IMAGINE SCENARIOS

DegreeInHealthy.com A structured wellness certification platform that reframes personal health as an earned credential — turning behavior change into a credential economy.

HealthGoneViral.com A consumer health content engine that weaponizes social sharing to spread evidence-based wellness — the name IS the strategy.

StickyHealth.ai A behavioral retention platform for corporate wellness programs — measuring and maximizing long-term habit adherence.

HealthUnimagined.com An AI diagnostics venture positioning itself at the frontier of what's medically possible — a name that makes patients and investors lean in.
