

MARKET CATEGORY

AI Safety, Security & Responsible Deployment

BACK-OFFICE AI TERM

AI Safety & Alignment / Responsible AI / AI Risk Management

CATEGORY HOOK

As AI moves from experiment to infrastructure, the question shifts from 'can we build it' to 'can we trust it.' Boards, regulators, and enterprise buyers are demanding safety-first AI posture. The brands that own the language of safe AI will be the first call when institutions need a partner they can defend to a regulator.

PRIMARY BUYER

Enterprise AI risk officers, government technology agencies, AI safety startups, cybersecurity firms expanding into AI governance, and compliance-driven institutional buyers.

IMAGINE SCENARIOS

YourSafeAI.com A consumer-facing safety certification standard — the UL mark for AI products, telling buyers this tool has passed independent safety review.

OurSafeAI.com A community-governed AI safety coalition where practitioners share incident reports, mitigation strategies, and standards in development.

AlsafeAndSound.com A board-level AI assurance consultancy — providing the executive summary that makes a C-suite confident in their AI deployment.
